MIXED-TEXT Glycolysis is a ten step pathway in the cytosol. Hexokinase traps glucose; PFK-1 is rate limiting. MIXED-TEXT Glycolysis is a ten step pathway in the cytosol. Hexokinase traps glucose; PFK-1 is rate limiting. MIXED-TEXT Glycolysis is a ten step pathway in the cytosol. Hexokinase traps glucose; PFK-1 is rate limiting. MIXED-TEXT Glycolysis is a ten step pathway in the cytosol. Hexokinase traps glucose; PFK-1 is rate limiting. MIXED-TEXT Glycolysis is a ten step pathway in the cytosol. Hexokinase traps glucose; PFK-1 is rate limiting.

p53 halts at G1/S
Cyclin B + CDK1 = MPF
Rb binds E2F

Lecture 7

MIXED-TEXT Glycolysis is a ten step pathway in the cytosol. Hexokinase traps glucose; PFK-1 is rate limiting. MIXED-TEXT Glycolysis is a ten step pathway in the cytosol. Hexokinase traps glucose; PFK-1 is rate limiting. MIXED-TEXT Glycolysis is a ten step pathway in the cytosol. Hexokinase traps glucose; PFK-1 is rate limiting. MIXED-TEXT Glycolysis is a ten step pathway in the cytosol. Hexokinase traps glucose; PFK-1 is rate limiting. MIXED-TEXT Glycolysis is a ten step pathway in the cytosol. Hexokinase traps glucose; PFK-1 is rate limiting.
